**To whom it may concern**

The International Bachelor in Mechanical, Materials and Aerospace Engineering at INSA Lyon will consider applicants from *Furen International School*, Singapore to the programme based on their academic results obtained over the two final years of high school. Conditional offers will be made on the strength of these results and on the predicted grades provided by the school. Applicants in possession of a conditional offer whose GCE 'A' level results in March meet the required grades of AAB (Maths A, Physics A) will then receive a full unconditional offer.

Professor Philippe Velez

Director of the *International Bachelor's  
Programme in Mechanical, Materials and Aerospace Engineering*
