Re: Recognition of 'A' Levels Study Programs

To Whom It May Concern,

This letter is to confirm that students from FIS Institute, Singapore who are currently undertaking 'A' Levels study programs that submit an application with preliminary results, will receive a conditional offer into a program of choice at the University of Western Sydney (UWS). This is subject to students meeting the UWS entry requirements of the program, such as subject pre-requisites. Students will need to provide their official final results once available. Students who are undertaking "O" Level study programs may also be eligible to receive a conditional offer to study UWS College Foundation Studies program subject to the program entry requirements.

If a student is unable to obtain/provide their final results in time to commence the semester, UWS will accept FIS Institute's forecasted results, but these results must be 2 points higher than that listed in our prospectus for international students. If all entry requirements and conditions are met, UWS will provide an unconditional offer. FIS Institute's forecasted results must accompany all student applications and be on official FIS School letterhead from the Registrar or alternate. UWS is unable to accept the AS results transcript as evidence of forecasted results. Students may receive an unconditional offer for the following semester only (only an offer into 1 semester – if students wish to obtain an offer for a later semester, they will be required to provide their official results).

Students must also meet the UWS English language requirements prior to receiving an unconditional offer.

Please note that the above conditions do not apply to programs that have a quota, or have other admission requirements. Please refer to the University's prospectus for international students, which clearly outline entry requirements for all UWS programs.

Kind regards,

Associate Professor Yi-Chen Lan
Director, UWS International
Associate Pro Vice-Chancellor (International)
